

Project Name: **Maintenance Yard Fleet Fueling Facility Upgrade**
 Developer/Client: **Orange County Fleet Maintenance**
 Project Location: **Orlando, Florida**
 Project Value: **\$ 480,000**

The contract with Orange County consisted of upgrading existing petroleum storage and distribution systems at four (4) fleet fueling facilities at road maintenance yards. Gasboy dispensers, EJ Ward card reader systems, and Xerxes double-walled fiberglass USTs were proposed. Existing soil and groundwater contamination was dealt with at several of the facilities. Construction layout and scheduling was coordinated so as not to interfere with normal facility operations
