

Project Name: **Peregrine International**
 Developer/Client: **Peregrine International**
 Project Location: **Tampa Area, Florida**
 Project Value: **Varies by site**

Stillwater has provided client representation before Hillsborough County BCC, Pasco County BCC, and has also provided all land planning, architectural, and engineering services for Peregrine International. Stillwater has also provided successful petitions to obtain variances from FDEP for UST setback from municipal well and landscape buffering reduction. Stillwater was also successful in amending the Meadowbrook PD to allow access from the fronting collector roadway onto the subject property. Without this access, the site would not be feasible as a convenience store with gasoline dispensing operations.

Recent projects include locations at Madison and 78th Street, Water Avenue and Montague Street, and Bruce B. Downs Boulevard. All located within the Tampa sub-market.
